

# MiramoPDF™

"... So can you imagine my excitement when I learned about a visual designer for DITA's PDF output called MiramoPDF? Instead of tweaking the XSL code, you just use an intuitive user interface to set up the layout and formatting."

"MiramoPDF is easy to use, it's affordable, and it will save you tons of money and time."

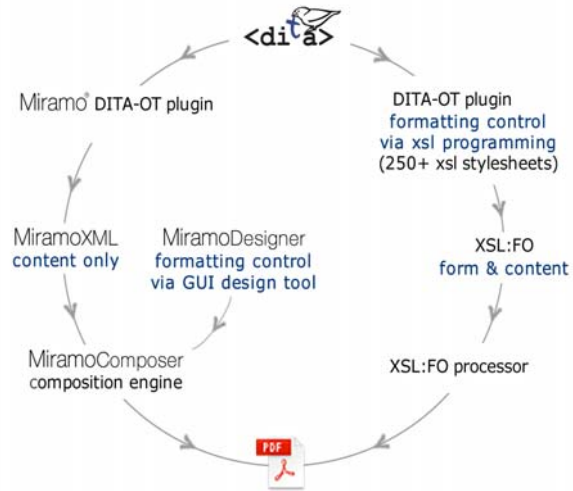

**Alex Masycheff**

"I am completely blown away by MiramoPDF. It offers all the power of XSL-FO with no need for XSL style sheet development. The GUI designer together with a powerful enterprise-scalable output engine create the long-awaited solution to customizing DITA-based PDF output."

**Leigh White**, Author of 'DITA for Print'

## MiramoPDF is better

**"All the power, one tenth the time"**

## Why use MiramoPDF?

- Gain control, speed and efficiency. Eliminate delays. Eliminate costs.
- The MiramoDesigner GUI replaces XSLT programming and the requirement for in-house developers and external consultants.
- Design capability for all industries, from manufacturing and financial documentation to marketing communications.
- Fast development of new document designs or re-creation of existing designs. Even faster design modification.
- Enterprise processing capability from single page leaflets to thousands of pages catalogs and everything in between.
- Individual departments can take control of their own documentation designs and modifications with minimal additional workload and training.
- Scalable from desktop to enterprise level. Includes job queuing, load management & job logging for large enterprises.
- Integrate with any CCMS or structured authoring environment with the Miramo DITA-OT plugin.
- Available in desktop and server versions on Windows, Linux and MacOS.
- Download an unlimited trial version of MiramoPDF 2.0 here.
